THE GOLD CHESTNUT NURSERY

COWEN, W. VA.

Cowen, West Virginia, December 1, 1945.

This Price List cancels all previous price lists issued.

All prices are FOB Cowen, W. Va. The price of our nursery stock, being based on current market conditions, is subject to change without notice and may be increased to include federal and state taxes levied on sales or any increase in the cost of materials or labor caused by federal or state legislation or regulation.

CHESTNUT TREES (Chinese mollissima), blight resistant.

Super Grade This grade represents the best trees that we can produce. They are uniform in size, well developed in both top and root systems. These trees are usually planted in door yards or where a good effect is desired along with other well developed trees.

	1 to 3 each	3 to 6 each	7 to 12 each
4 - 6 ft.	\$4.50	\$4.00	\$3.80
3 - 4 ft.	3.50	3.00	2.70
2 - 3 ft.	2.50	2.00	1.80

	1 to 6 each	6 to 12 each	12 to 50 each
<u>Regular Grade</u> 4 - 6 ft.	\$3.00	\$2.75	\$2.50
3 - 4 ft.	2.25	2.10	1.95
2 - 3 ft.	1.75	1.60	1.45

Our regular grade trees are the same age and size as the super grade. In most cases they are not quite so well developed nor as uniform in size. This stock is generally used for commercial plantings or where the shape of the tree is not an important consideration.

The trees listed below are 2-yr. old and are what we call our "2-ft. grade." They are all well rooted and most of them are branched. A few may be whips. This size and grade is used largely for commercial plantings and for which it is recommended. It is good thrifty stock and every tree should grow.

Each \$1.25. No reduction for quantity. We offer here maximum quality at a minimum price.

One-yr. Seedlings for reforestation or lining out to be cultivated for 1 or 2 years where larger sized trees are to be developed. This stock will range from 8 to 14 inches high, branched, with most of the stock 10 to 12 inches. It carries approximately as much roots as top.

6 for \$5.00. 12 for \$10.00. Any amount over 12, 75 cents each.

-2- Price List

APPLE TREES- 1-yr. old, grafted stock. Some of these varieties will be 18-24 in. while stronger growing varieties will be 2-3 ft. They are all whips, good, strong clean stock. Price \$1.00 each for the following varieties:

Baldwin	Red York Imperial	Scarlet Staymen
Paradise Winter Sweet	Red Rome Beauty	Grimes Golden
Double Red Delicious	Red Spy	Vandever

There has been so much said in the description of the common varieties of apples that there is but little more to be said except to mention the special qualities. The Baldwin is recommended for making applebutter. Paradise Winter Sweet is an apple that is extremely sweet, crisp, juicy and will keep all winter. The other varieties down to Grimes Golden are bud sports of the old well known varieties but for some unknown reason are solid red. They are considered superior to the original varieties. Grimes Golden is the well known Fall apple. The Vandever is a variety of apple so far as we know not being propagated by any other nursery. It is an apple that was discovered in Virginia and grafted by the pioneers from one plantation to another more than one hundred years ago. It is known to have been brought across the Alleghenies by a pioneer settler before West Virginia became a State. The chief value of this apple is for frying for which we doubt that it has an equal. It is also a good keeper, medium size and almost solid red.

Apple trees, 2-yr. old grafted stock, 4-6 ft., above mentioned varieties, available for Fall, 1946, Spring 1947, Price \$1.75 each.

SWEET CHERRIES (Fall Bearing) August Supreme and Sweet September.
